Move up to 500 lbs over concrete by yourself

The “Make-Concrete-Projects-Easy” Tools: CreteSheet™ concrete mixer + BigSlider™ utility mover

See our Green, Back-Saving, Award-winning Tools

World of Concrete Feb 3-6, 2009, Booth S-22411

CreteSheet and BigSlider are the perfect combination for concrete projects: BigSlider gets the bags where you need them, and CreteSheet quickly mixes 80 lbs of concrete in 90 seconds. Your back will thank you since both tools use the ground to carry the weight. John Shoemaker will demonstrate “Concrete Made Easy” at booth S-22411 (South Hall, second floor).

Both tools are green: human-powered and made of recyclable plastic. Not only that, both were chosen by Popular Mechanics to receive their coveted Editor’s Choice Award for top new tools. BigSlider has been featured on two DIY Network “Cool Tools” episodes and was named one of 14 top “Hot Tools for 2009” by Canadian Home Workshop. CreteSheet was also named a World of Concrete MIP Winner for most innovative product.

BigSlider will be displayed with CreteSheet at the World of Concrete February 3-6, 2009 at the Las Vegas Convention Center.
